Bot APIs

- Botpress API

Botpress API

End Point

https://backend.versalence.online/api/v2/agent-builder/ext

The x-api-key will be provided separtely

Bot Operations

List Bots

GET /workspaces/{workspaceId}/bots

List the bots registered in the selected workspace, including build type and timestamps.

Path parameters

Name	Type	Required	Description
`workspaceId`	string	Yes	Workspace identifier

Curl

```
curl --request GET \
  --url 'https://backend.versalence.online/api/v2/agent-
builder/ext/workspaces/{workspaceId}/bots' \
  --header 'x-api-key: YOUR_API_KEY'
```

200 Successful response · `application/json`

```
{
  "success": "boolean",
  "data": [
    {
      "id": "string (UUID)",
      "name": "string",
      "buildType": "string",
      "createdAt": "string (date-time)",

Get Bot Info

GET /workspaces/{workspaceId}/bots/{botId}/credentials

Get Bot Integrations fetch integration status and webhook configuration for the requested bot. Treat the response as sensitive because it can contain a webhook secret.

Path parameters

Name	Type	Required	Description
`workspaceId`	string	Yes	Workspace identifier
`botId`	UUID	Yes	Bot identifier

Curl

```
curl --request GET \
  --url 'https://backend.versalence.online/api/v2/agent-
builder/ext/workspaces/{workspaceId}/bots/{bot_id}/credentails' \
  --header 'x-api-key: YOUR_API_KEY'
```

Responses

200 Successful response · `application/json`

```
{
  "success": "boolean",
  "data": {
    "botId": "string (UUID)",
    "name": "string",
    "enabled": "boolean",
    "workspaceId": "string",
    "webhook": {
      "integrationId": "string",
      "enabled": "boolean",
      "webhookId": "string (UUID)",
      "secret": "string (sensitive)"
    }
  }
}
```

Example response

```
{
  "success": true,
  "data": {
    "botId": "4fad64bd-0254-46a5-afdf-cdcae98c85b5",
    "name": "National Industries",
    "enabled": true,
    "workspaceId": "wkspace_01M4XM03S725556S8YM712H1W0",
    "webhook": {
      "integrationId": "intver_01KVC0MXH1NRBX66RQ9CR7Z14E",
      "enabled": true,
      "webhookId": "a05ffe7b-4c0a-4b27-acc5-de6d209ff6f7",
      "secret": "REDACTED"
    }
  }
}
```

Get Conversations by conversation_id

> GET /workspaces/{workspaceId}/bots/{botId}/conversations/{conversationId}/messagesGet

Return conversation messages, including text and choice payloads, direction, timestamps and optional pagination token. The illustrated response is ordered newest first; sort by `createdAt` to reconstruct the conversation chronologically.

Path parameters

Name	Type	Required	Description
`workspaceId`	string	Yes	Workspace identifier
`botId`	UUID	Yes	Bot identifier
`conversationId`	string	Yes	Conversation identifier

Curl

```
curl --request GET \
  --url 'https://backend.versalence.online/api/v2/agent-
```

```
builder/ext/workspaces/{workspaceId}/bots' \
  --header 'x-api-key: YOUR_API_KEY'
```

Data model notes

Field	Meaning
`success`	Boolean indicating application level success
`data`	Endpoint result; array for bots and messages, object for integrations
`partial`	List bots response field indicating partial result in the supplied example
`nextToken`	Message pagination token; null in the supplied example. Its request parameter format is not documented in the supplied samples.
`payload`	May be text or a choice object with labeled options
`direction`	`incoming` or `outgoing`

Only HTTP 200 response bodies were provided. Error statuses, pagination request semantics, scopes, limits, and other integrations are not asserted here.
