

Botpress API

End Point

<https://backend.versalence.online/api/v2/agent-builder/ext>

The x-api-key will be provided separately

Bot Operations

List Bots

GET /workspaces/{workspaceId}/bots

List the bots registered in the selected workspace, including build type and timestamps.

Path parameters

Name	Type	Required	Description
<code>workspaceId</code>	string	Yes	Workspace identifier

Curl

```
curl --request GET \  
  --url 'https://backend.versalence.online/api/v2/agent-  
builder/ext/workspaces/{workspaceId}/bots' \  
  --header 'x-api-key: YOUR_API_KEY'
```

200 Successful response · `application/json`

```
{
  "success": "boolean",
  "data": [
    {
      "id": "string (UUID)",
      "name": "string",
      "buildType": "string",
      "createdAt": "string (date-time)",

Get Bot Info

GET /workspaces/{workspaceId}/bots/{botId}/credentials

Get Bot Integrations fetch integration status and webhook configuration for the requested bot. Treat the response as sensitive because it can contain a webhook secret.

Path parameters

Name	Type	Required	Description
workspaceId	string	Yes	Workspace identifier
botId	UUID	Yes	Bot identifier

Curl

```
curl --request GET \
  --url 'https://backend.versalence.online/api/v2/agent-builder/ext/workspaces/{workspaceId}/bots/{bot_id}/credentials' \
  --header 'x-api-key: YOUR_API_KEY'
```

Responses

200 Successful response · application/json

```
{
  "success": "boolean",
  "data": {
    "botId": "string (UUID)",
    "name": "string",
    "enabled": "boolean",
    "workspaceId": "string",
    "webhook": {
      "integrationId": "string",
      "enabled": "boolean",
      "webhookId": "string (UUID)",
      "secret": "string (sensitive)"
    }
  }
}
```

Example response

```
{
  "success": true,
  "data": {
    "botId": "4fad64bd-0254-46a5-afdf-cdcae98c85b5",
    "name": "National Industries",
    "enabled": true,
    "workspaceId": "wkspace_01M4XM03S725556S8YM712H1W0",
    "webhook": {
      "integrationId": "intver_01KVC0MXH1NRBX66RQ9CR7Z14E",
      "enabled": true,
      "webhookId": "a05ffe7b-4c0a-4b27-acc5-de6d209ff6f7",
      "secret": "REDACTED"
    }
  }
}
```

Get Conversations by conversation_id

GET /workspaces/{workspaceId}/bots/{botId}/conversations/{conversationId}/messagesGet

Return conversation messages, including text and choice payloads, direction, timestamps and optional pagination token. The illustrated response is ordered newest first; sort by `createdAt` to reconstruct the conversation chronologically.

Path parameters

Name	Type	Required	Description
<code>workspaceId</code>	string	Yes	Workspace identifier
<code>botId</code>	UUID	Yes	Bot identifier
<code>conversationId</code>	string	Yes	Conversation identifier

Curl

```
curl --request GET \
  --url 'https://backend.versalence.online/api/v2/agent-
```

```
builder/ext/workspaces/{workspaceId}/bots' \  
--header 'x-api-key: YOUR_API_KEY'
```

Data model notes

Field	Meaning
success	Boolean indicating application level success
data	Endpoint result; array for bots and messages, object for integrations
partial	List bots response field indicating partial result in the supplied example
nextToken	Message pagination token; null in the supplied example. Its request parameter format is not documented in the supplied samples.
payload	May be text or a choice object with labeled options
direction	incoming or outgoing

Only HTTP 200 response bodies were provided. Error statuses, pagination request semantics, scopes, limits, and other integrations are not asserted here.

Revision #7
